

# T-Panel

T-Panel is an architectural profile that provides an aesthetic appearance that only a pan and batten system can. This profile is easy to install and offers no exposed fasteners upon completion. It is a very popular product commonly used on curved architectural roofs and barrel vault roofs. T-Panel must be installed over a solid substrate, such as plywood.

- **Attractive appearance**
- **Long-lasting and durable**
- **Non-combustible**
- **Energy efficient**
- **Low maintenance**
- **Excellent qualities in wind resistance**
- **Sheds water, snow and ice**
- **Great for new construction & re-roofing projects**
